PROFESSIONAL EXPERIENCE

TEGENCE

Product Manager

Remote

February 2025 -Present

- Led product discovery and delivery across multiple AI-driven products in HR Tech, Energy, E-commerce, and Hospitality.
- Work closely with engineers and designers to translate business problems into product requirements, user flows, technical scopes, and implementation priorities from ideation through deployment.
- Managed Praxis, an organizational operating system, driving feature development, identifying product issues, improving the design system with designers, creating engineering tickets, and coordinating delivery.
- Use AI-assisted prototyping to rapidly explore product ideas, communicate concepts with stakeholders, and support engineering implementation.

SABI

Junior Product Manager

Victoria Island, Lagos

April 2024 - July 2025

- Analyzed user feedback and data to inform product development decisions and prioritize features based on customer and business needs
- Work closely with engineers and designers to translate business requirements into user stories, product flows, and technical requirements.
- Managed product backlog, sprints using ClickUp, Notion and Azure DevOps, tracking development tickets to ensure timely delivery of product features, improving cross-team coordination and sprint efficiency.
- Led development of an internal HR platform that digitized manual employee lifecycle workflows, from onboarding through offboarding.

NSIA INSURANCE

System and Database Administrator

Victoria Island, Lagos

January 2023 – February 2024

- Led the development and implementation of a Claims Payment Module, improving claims payment efficiency and customer experience.
- Collaborated with end users to troubleshoot and resolve database and application issues, improving system reliability and user satisfaction.

SKILLS

Product Management: Product Discovery, Product Strategy, Roadmap Planning User Stories & Backlog Management, Sprint Planning, Product Documentation, QA & Delivery

Product & Delivery: ClickUp, Azure DevOps, Figma, Notion, Project management

Frontend: React (TypeScript), HTML, CSS

Backend: Python(FastAPI), NodeJS (Express + Drizzle), REST APIs, SQL (Postgres)

SELECTED PRODUCTS

Praxis - Tegence

An operating system for organizations bringing employee management, work, communication, performance, and day-to-day operations in one platform.

- Drove product direction and feature delivery across requirements gathering, user stories, backlog management, design reviews, sprint planning, QA, and launch planning.
- Worked closely with design and engineering teams to identify product issues, refine workflows, and translate requirements into features.

Internal Human Resource Management Platform - Sabi

An Internal HR platform digitizing employee lifecycle management from onboarding to offboarding.

- Defined employee lifecycle workflows with HR stakeholders and translated requirements into user stories and product specifications.
- Managed backlog, design reviews, sprint planning, QA, and delivery with engineering teams.
- Digitized manual processes including offer letters, ID card issuance, employee information management, and departmental/team assignments.

Landmark Customer Service AI Agent - Tegence

An AI-powered customer service agent enabling customers to make bookings, request refunds and reschedules, and submit enquiries through conversational interactions.

- Defined customer workflows and product requirements and translated them into user stories and engineering requirements.
- Worked with engineering and business teams on an AI agent using RAG and AI orchestration to understand customer requests and trigger appropriate actions.

The New Breed Church Management System - Personal

Built a full-stack production using React TS and FastAPI (SQLAlchemy) to solve manual workflows in The New Breed Church:

- Built a full-stack application using React, TypeScript, FastAPI, SQLAlchemy, and PostgreSQL with member management, follow-up feedback, attendance and offering tracking, RBAC, and email broadcasts.
- Built QR-code-based worker attendance with geolocation validation and automated attendance reporting, deployed on Render.

EDUCATION

REDEEMER'S UNIVERSITY

Bachelor of Science in Computer Science
Second Class Upper

Ede, Osun State, Nigeria

September 2018 - October 2022
